SUMMARY

Final-year Computer Science and Engineering student at Northern University of Business and Technology Khulna. I build web projects with Next.js and TypeScript, deployed on Vercel, and I built a complete Laravel e-commerce app for my university field work. I am also co-first author on a research manuscript submitted to a journal and currently under review. I am looking for junior web developer roles and internships.

EDUCATION

Northern University of Business and Technology Khulna Expected 2026
B.Sc. in Computer Science and Engineering

Khulna Government Model School and College 2020
Higher Secondary Certificate (HSC), Science, Jashore Board. GPA 4.75 out of 5.00

Khulna Public College 2018
Secondary School Certificate (SSC), Science, Jashore Board. GPA 4.50 out of 5.00

RESEARCH EXPERIENCE

Undergraduate Researcher (Co-First Author) 2026 – Present
Northern University of Business and Technology Khulna, in collaboration with University of Dhaka

- Designed 9 derivatives of 3 parent flavonoids through 7-position modifications, validated with RDKit.
- Ran molecular docking (AutoDock Vina), 100 ns MD simulations with RMSD, RMSF, Rg, PCA and DCCM analysis, and MM/GBSA binding free energy calculations.
- Manuscript submitted to a journal; currently under review.

SELECTED PROJECTS

Ajker Akash, Weather Dashboard 2026
Next.js, TypeScript, Tailwind CSS, Open-Meteo API. Live at weather-app-nine-red-79.vercel.app; code at github.com/jabbirxd/weather-app

- Live weather dashboard with city search and autocomplete, current conditions, and a 5-day forecast, using the keyless Open-Meteo API with loading and error states.
- Sky gradient is computed from the live weather code and time of day.

Task Manager 2026
Next.js, TypeScript, Tailwind CSS, localStorage. Live at task-manager-godspeed630.vercel.app; code at github.com/jabbirxd/task-manager

- Task manager with priorities and status filters, derived from a single typed task list. Tasks persist in localStorage, so nothing is lost on refresh.

Techif Store, Laravel E-commerce App 2025
PHP, Laravel, Livewire, Blade, MySQL. University field work project (solo). Code at github.com/jabbirxd/techif

- E-commerce app with a product catalog (categories, brands, colors, images), cart, wishlist, and checkout with Cash on Delivery and PayPal.
- Admin panel with role-based access for products, orders, users, sliders, and settings. Completed and run locally; not deployed.

Buyora, Laravel E-commerce App 2026
PHP, Laravel, Livewire, Blade, MySQL. Rebrand and redesign of Techif Store for field-work use. Code at github.com/jabbirxd/buyora

- Storefront with search, multi-image gallery, cart, wishlist, and checkout with Cash on Delivery and SSLCommerz / aamarPay sandbox payments.
- Admin panel for products, orders, users, settings, and contact messages, with one-click visibility toggles. Runs locally; not deployed.

Personal Portfolio 2026
Next.js, TypeScript, Tailwind CSS. Live at jabbirxd.online

- Responsive site with dark and light themes, project case studies, and a printable resume page.

TECHNICAL SKILLS

Comfortable with: Next.js, React, TypeScript, Tailwind CSS, Git and GitHub, REST APIs, Vercel deployment

Also worked with: PHP, Laravel, Livewire, MySQL

Research tools: RDKit, AutoDock Vina, OpenMM (MD simulation), MM/GBSA

Languages: Bengali (native), English
